

11.18 Frame Smokehouse # 5695

The following smokehouse was designed in 1965 by the North Dakota State University and the U.S. Dept. of Agriculture. This is a big walk-in smokehouse requiring a foundation reaching below the frost line. This is the depth where water can still be found frozen depending on a particular geographical location.

Fig. 11.18.1 General view.

Description

This is a classical design of a smokehouse that has been used in Europe and later in the USA for centuries. About 10' high, ventilation on both sides, # 30 mesh screen on the inside and a hinged door on the outside. Roof covered with tight sheathing and the frame secured to the foundation with $\frac{1}{2}$ " anchor bolts. A removable utility bench inside and the barrel with salt in the corner.
